

## Instructions: Part 2

- You will play 5 more periods, similar to the ones you played in Part 1.
- In each period everyone in the room will take on the role of the GREEN player.
- The interface will randomly select a previous period from this session. From that previous period the interface will select as ‘Computer X and ‘Computer Y’ the selections that were chosen for a random group in that period. Where it makes sure that you were not a member of that group.
- The interface will display the recommendations that the BLUE and RED members in that group sent.
- You will know how far away BLUE’s and RED’s best points are from yours and will take the role of the GREEN player to make a decision.
- Only you will receive any payment from this round, and as the GREEN player, the closer you are to the Computer’s chosen points, the higher your payoff. The BLUE and RED player from the random selected round will not receive payment for these rounds.
